

# Take A Deep Breath And Hold It...

*(OK, let it out.)*

## *The Flue Season Breathe Easy Air Duct Service Comparison Chart*

We have four levels, or grades, for our duct cleaning services. Each serves a client with slightly different needs or wants. We label them A+, B+, C+, and C Average. All of our service levels provide full protection for your home and furnishings.

Air ducts get contaminated because “stuff” gets in with the air and this “stuff” settles in the ducting. This “stuff” both draws moisture and may breed other stuff as well as be blown around your home or office where it lands on things and gets inhaled.

Our best practice duct service, as we see it, is not only to clean the ducting but to prevent contamination from recurring. The highest grade items and procedures help to decrease air born contamination into the ducting system. However, this does not mean that a higher grade is something everyone needs - for example: You may already have electrostatic lifetime air filters, or, a fairly new and well sealed system, etc.

Service Performed ↓	Level Of Service →			
	C	C+	B+	A+
We guarantee no dust, no dirt, no mess, always. We have clean drop cloths for furniture and floor protection.	X	X	X	X
We replace the air return filters with electrostatic, anti-microbial air filters. This is a lifetime filter. It never needs replacing.			X	X
We pressure test the ducting for leaks. Leaky ducts may pull in contamination from under the house or from the attic.				X
Clean the supply ducts. Top of the line equipment; Different tools for different types of ducts; Not a “one tool fits all” company.	X	X	X	X
We will clean the return ducts. This is where the heaviest contamination usually occurs.	X	X	X	X
We will hand wash all the registers.		X	X	X
We will clean the AC condenser coils.		X	X	X
